

Memo

To: Mayor Timothy Woerther
Wildwood City Council Members

From: Mike Hartwig, Assistant City Engineer
Joe Vujnich, Director of Planning & Parks

Date: January 8, 2016

Re: Construction Project Updates

Following is an update on all active City construction projects. The Departments of Public Works and Planning/Parks will be available for any questions at the January 11, 2016 City Council Meeting.

Route 109 Improvements (Route 100 to Clayton): The contractor has completed the replacement of most of the dead landscaping. This replacement landscaping will be monitored over the next year and replaced again if necessary. MoDOT has taken over maintenance of the project from the contractor.

City Bridge Inspections: The City and our engineering consultant completed the field inspections of the City's smaller bridge structures, along with the pedestrian bridges and tunnels. These inspections included the structures that are under 20' in span length and not on the list of bridges that MoDOT inspects with the City every other year. The engineering consultant will submit inspection reports in January.

Ossenfort Road Culverts: The City's contractor completed the installation of additional culvert pipes under Ossenfort Road near Ossenfort Court. This improvement will help to lessen the flooding of Ossenfort Road that occurs in that area during heavy rains.

Manchester Road Great Streets Project: The contractor has completed the project and will complete any remaining final planting work as weather allows.
