Re: **On-Going and Long-Term Maintenance Costs for Parks and Trail Facilities**

Council Members:

The City Council, during its Strategic Planning Process that was held in March 2015, identified the need to ensure that, as facilities are added to the City's system of parks and trails, the costs associated with their maintenance and upkeep are addressed and managed as well. In response to this action of the City Council, the Chair of the Planning/Economic Development/Parks Committee requested, which was agreed to by the members, that each month an update of spending on parks and trail maintenance be provided for their review, along with any unusual allocations in this regard as well. Additionally, at the February 23, 2016 meeting of the Committee, the members also agreed this information should be provided to City Council as well, on a monthly basis.

In terms of the reporting of these expenses and expenditures, the Committee is providing a historical trend for maintenance expenses for the last ten (10) years, to offer context, while also noting current month-to-month allocations. This information is provided below:
